

Options for Terabits of Bandwidth

37% CAGR of busy hour traffic = DOUBLING every 1.9 years. Additional capacity is needed to support the peak. 3 Petabits/s equals 3,000,000 Gbps. Global internet traffic will increase by 3,000,000 Gbps by August 2021.

DHD is a forerunner in providing Custom Configuration Management Solutions for high-bandwidth DWDM optical connectivity leveraging compatible optical transceivers, white-box switches, and optical systems.

DWDM Digital Optics Means High Bandwidth in Access Networks

Third Party Transceivers	Coherent		PAM4
	Rate(Gbps)	100, 200	40, 50, 100
	Form Factor	CFP, CFP2	QSFP
Systems & Solutions	Application	DCI, Metro, Long-haul, Mobile back-haul, RemotePhy	DCI, Mobile Mid-haul, RemotePhy
	Host Platforms	Whitebox DCI Transponder, Open Packet Optical Transponder, Transponder & regenerators	Whitebox switches, Transponder
	Line System	Open Line System, optimized for coherent	Self-Adaptive, Zero-Touch Provisioning, optimized for PAM4
DHD	Management Interface	Open API, SNMP, CLI, Web, NMS/EMS	
	Value Proposition	Custom Configuration Management Solutions for high-bandwidth DWDM optical connectivity leveraging 3rd party transceivers. Open, flexible, and scalable systems.	

• Coherent and PAM4 DWDM transceivers compatible with OEMs such as Cisco, Arista, Juniper, Dell, HP, etc.

• DWDM Open Line Systems
• White-box switch & optical transponders

We offer aggressive discounts for larger quantity orders.
